IV. Specific Comments

ADMIN RECORD

Draft ER RSOP Notification for IHSS Group 900-2

Written comments were received from EPA and CDPHE. The following resolutions were agreed to:

EPA Comments

1. PCBs are the soil removal driver. As the PCBs are removed, associated VOCs will be removed also. Additionally, as soil removal proceeds, confirmation sampling results will be used to determine whether additional soil removal is necessary.

CDPHE Comments

1. The SSRS is correct for the notification. The SSRS will be revisited during soil removal and in the Closeout Report. The Closeout Report SSRS will include how the land reconfiguration will affect erosion potential in this area. Additional text will be added to section 3.0 to clarify.
2. The SSRS is correct for the notification. The SSRS will be revisited during soil removal and in the Closeout Report. The Closeout Report SSRS will include how the land reconfiguration will affect erosion potential in this area. Additional text will be added to section 3.0 to clarify. The two recent downgradient wells will be added to the Screen 4 evaluation.
3. The SSRS is correct for the notification. The SSRS will be revisited during soil removal and in the Closeout Report. The Closeout Report SSRS will include how the land reconfiguration will affect erosion potential in this area. Additional text will be added to section 3.0 to clarify. A volume estimate will be added to the notification. Additionally text will be added that states that HRC or another amendment will be added after soil removal.

Section 2.4.2 "HISS" will be changed to "IHSS".

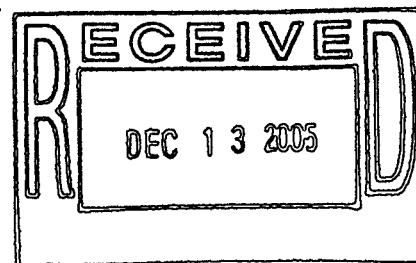

4. The SSRS is correct for the notification. The SSRS will be revisited during soil removal and in the Closeout Report. The Closeout Report SSRS will include how the land reconfiguration will affect erosion potential in this area. Additional text will be added to section 3.0 to clarify.
